

## USER MANUAL

### MAIN PAGE

This is the main page of the Lorem Ipsum Website and on the main page we have several features like the sticky pads and pop-up tabs.

1. For the Exclusive page on the right top corner,it directs you to a different page of clothing which are our exclusive clothes.
2. The women button on the top right corner also directs you to the women's page.
3. The mens button on the top right corner also directs you to the mens clothing page.
4. The last button also directs you to our projects page and on this page you will find our upcoming project designs.

## Mission Page:

This is where our statement is located. This is where we state our cause that we are making awareness for. In this case, it is wildfires. This is our inspiration and the reason why we are doing all of this.

Grass fires are a major concern for firefighters in early spring; they get quickly out of control and can cause serious damage in agricultural and forested lands. Forest fire officials encourage people not to light grass fires or burn debris. Burning dry grass in fields or yard debris can spread to nearby forests.

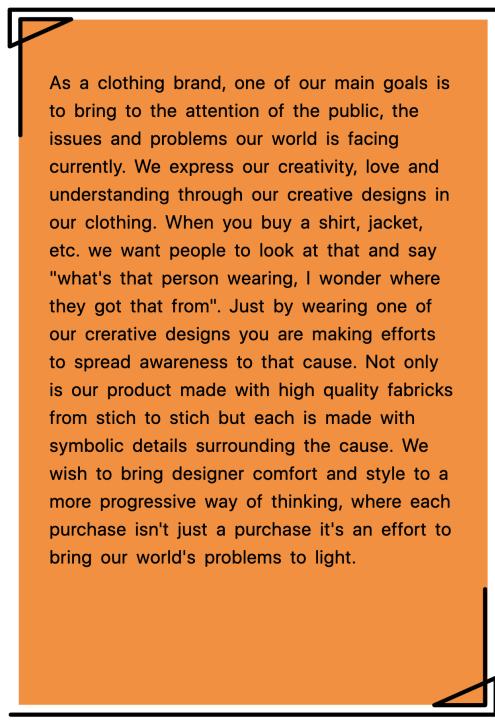

Wildfires release large amounts of carbon dioxide, black carbon, brown carbon, and ozone precursors into the atmosphere. These emissions affect radiation, clouds, and climate on regional and even global scales.

"In 2018, nearly 9 million acres were burned in the US alone"

— WWF (World.Wild.Life.)

## Feature Page:

A featured item will appear here along with a statement. The statement is all about the clothing itself. This can include why it's made, the material used, and other important pieces to the clothing. It will also elaborate on the awareness we are trying to spread.

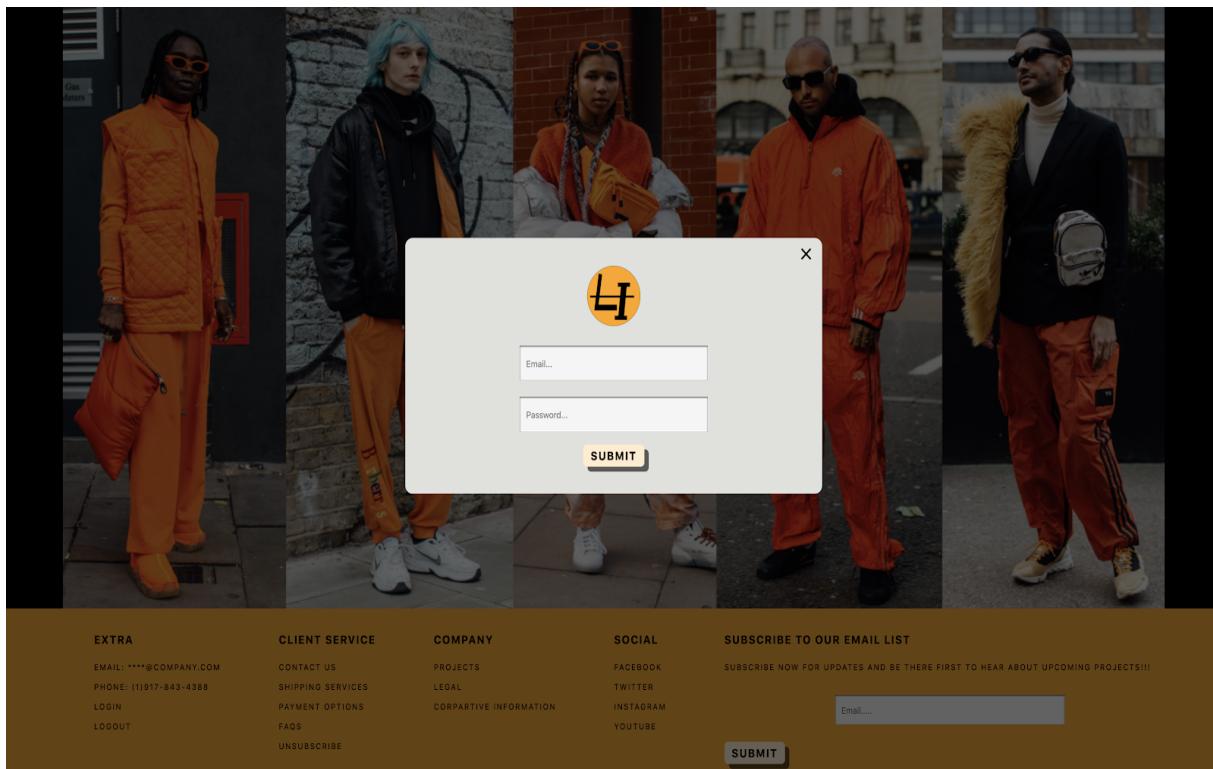

## Main Features:

Login: User Input Email + Password, pushes that to firebase, firebases authenticates the user using auth. The user is now signed in. If an incorrect email or password alert will show up on top of the screen.

Logout: Logs out User out via the firebase database

Create Account: Pushes user input Email + Password

**Email Subscription List:** Located at the bottom of the page. Sign up using your email to be part of a subscription list. When a user subscribes to our email list, the customer is sent monthly updates on our releases and is informed on the global issues. The email list gives us a chance to develop personal connections with our customers and also gives us a chance to educate them on the impending issues in our society.

## Firebase User authentication (Our Database):

Firebase is a mobile and web application development platform developed by Firebase, Inc. Firebase was the database we decided to use because it was easy to use and our files could easily be accessed. In the images displayed below, our firebase page is shown, and a few of our customers have their emails saved on our database. All customers who subscribed to our email list will have their information saved on our database and will receive monthly updates on any new lines or designs we release.

The screenshot shows the 'Templates' section of the Firebase console. On the left, there's a sidebar with icons for Email, Password reset, Email address change, SMTP settings, SMS, and SMS verification. The 'Email' icon is selected. On the right, the 'Email address verification' template is displayed. It includes a description: 'When a user signs up using an email address and password, you can send them a confirmation email to verify their registered email address.' Below this is a preview area with fields for 'From' (set to 'noreply@e-commerce-f6be2.firebaseioapp.com'), 'Reply to' (set to 'noreply'), and 'Subject' (set to 'Verify your email for project-750795228887'). The message body contains a greeting, a link for verification, and a note about ignoring the email if not requested. At the bottom, it shows the template language is English. There are also 'Template language' and 'Edit' buttons.

The screenshot shows the 'Authentication' section of the Firebase console under the 'E-commerce' project. The 'Users' tab is selected. A search bar at the top allows searching by email address, phone number, or user UID. Below the search bar is a table with columns: Identifier, Providers, Created, Signed In, and User UID. Two user entries are listed: one for 'test@gmail.com' and another for 'fake@gmail.com'. Both users were created on Jun 10, 2020, and signed in on Jun 10, 2020. Their respective User UIDs are shown. At the bottom of the table, there are pagination controls for 'Rows per page' (set to 50), '1-2 of 2', and navigation arrows. Other tabs visible include 'Sign-in method' and 'Usage'.
